DRUG & ALCOHOL TESTING COMPLIANCE SERVICES

We believe turnaround time is of the essence. Below is a table of typical turnaround times.

If a Non-Regulated and Regulated (DOT) test is negative and has no eventful processes. The typical turnaround time is 2 business days.

If the collection is eventful there are multiple factors that contribute to the delay.

Factors that can contribute to delay:

- Not picked up at collection site on the same day
- Affidavit required
- Metabolite detected
- MRO has not received CCF from collection site
- MRO unable to connect with employee, this process can be up to 10 business days
